[Coronavirus: Why it might not be as scary as it sounds - from BBC Newsround](#)

If you or your child have a cough, shortness of breath, sore throat and/or a fever please don't attend any Child and Family Health Services until you are well.

We appreciate your help in keeping other children, their families and our staff well.

Call your local **Child and Family Health Centre** to discuss alternate ways that we are currently offering to connect your family with our Child and Family Health Service.

Contact your **GP** or call **Healthdirect** on **1800 022 222** for health advice.
