Prader-Willi Syndrome Research Study

Brain imaging study

What is the purpose of the study?
The Purpose of this study is to gain a better understanding of the connectivity and structure of the Prader-Willi syndrome brain. This study is being led by Professor Stewart Einfeld, Senior Scientist at the BMRI.

Who can participate?
Individuals with Prader-Willi Syndrome aged 16 years and older are invited to participate in this study.

What does the study involve?
Eligible participants will be invited to participate in a non-invasive magnetic resonance imaging scan at the Brain and Mind Research Institute at Camperdown in Sydney, NSW. At the visit people with PWS and their carers will be introduced to the experience of an MRI machine through an MRI simulator and only if they feel comfortable will be invited to participate in the real study.

How do I get involved?
If you are interested in participating in this study you can either call or email Lauren on Phone: 02 9114 4106 Email: lauren.rice@sydney.edu.au
